

WARNING FOR THE SAFETY AND SECURITY OF OUR COMMUNITIES!

Racist, islamophobic and anti-immigrant movements in Portugal are increasing their attacks on our communities.

Together with the violent physical attacks to members of our community, they are spreading the lies amongst the portuguese society, claiming that we do not work and live off the Portuguese government's money, calling us dirty and blaming us for the lack of cleanliness of our streets, and representing us as dangerous and part of a plan to "replace the white population" and "islamize Europe".

Recently, these groups have been spreading hateful propaganda videos, made from images collected by them in the areas where we are concentrated, aiming to turn the Portuguese population against us.

This country will have elections for its parliament on March 10. It is likely that, until then, many politicians will be visiting this place. Be more cautious of their intentions!

Beware of people from outside recording images!

Do not allow yourself to be recorded or interviewed by people you do not know!

FOR THE PROTECTION OF OUR COMMUNITIES AND OUR FAMILIES - BE AWARE!
